

Indications:

- Acute and chronic pancreatitis
- Acute and chronic diarrhea
- Hyperlipidemia
- Lymphangiectasia
- Exudative enteropathy
- Bacterial overgrowth, antibiotic-responsive diarrhea (ARD)
- Exocrine pancreatic insufficiency (EPI)
- Bile acid deficiency

Contraindications:

- Growth
- Pregnancy, lactation

Nutritional Differences:

Digestive Support:

Helps to maintain the balance of gastrointestinal microflora and intestinal mucosa integrity

Low Fat:

Low fat concentration improves digestive function in dogs with hyperlipidemia or pancreatitis

Fiber Balance:

Low fiber content ensures high digestibility, nutrient absorption, and limits colonic fermentation

Antioxidant Complex:

A precise blend of antioxidants helps support a healthy immune system

Additional Differences:

- The most fat-restricted dry diet in the therapeutic market
- Highly digestible proteins and starches compensate for decreased intestinal enzymatic activity ensuring optimal intake of nutrients
- Enriched with fructooligosaccharides (FOS), hydrolyzed yeast, and zeolite (sodium silico aluminate) to help maintain intestinal health

Notes:

- The feeding duration varies depending on the severity of gastrointestinal signs
- In cases of chronic disease, lifetime feeding may be necessary or beneficial

Feeding Recommendations for Canine Adult Maintenance:

Body Weight		Suggested Caloric Intake	Daily Feeding			
lb	kg		Kcal per day	Grams per day	Cups per day	Grams per day
5	2.3	240	69	1	251	2/3
10	4.5	398	114	1 1/2	416	1
20	9.1	660	189	2 1/2	690	1 3/4

Ingredients:

ROYAL CANIN Veterinary Diet® canine GASTROINTESTINAL™ LOW FAT LF™ 20 dry
 Rice, chicken meal, wheat, barley, natural flavors, dried beet pulp, brewers dried yeast, chicken fat, salt, calcium carbonate, sodium silico aluminate, psyllium seed husk, fish oil, potassium chloride, fructooligosaccharides, monocalcium phosphate, hydrolyzed yeast, choline chloride, DL-methionine, taurine, marigold extract (*Tagetes erecta* L.), Vitamins [DL-alpha tocopherol acetate (source of vitamin E), L-ascorbyl-2-polyphosphate (source of vitamin C), biotin, D-calcium pantothenate, pyridoxine hydrochloride (vitamin B6), vitamin A acetate, niacin supplement, thiamine mononitrate (vitamin B1), riboflavin supplement (vitamin B2), folic acid, vitamin B12 supplement, vitamin D3 supplement], Trace Minerals [zinc oxide, zinc proteinate, ferrous sulfate, manganese sulfate, copper sulfate, copper proteinate, manganous oxide, calcium iodate, sodium selenite], rosemary extract, preserved with natural mixed tocopherols and citric acid.

ROYAL CANIN Veterinary Diet® canine DIGESTIVE LOW FAT LF™ can
 Water sufficient for processing, pork by-products, pork liver, corn grits, rice flour, chicken by-products, gelatin by-products, powdered cellulose, dicalcium phosphate, calcium carbonate, natural flavors, tetra potassium pyrophosphate, dried beet pulp, guar gum, fish oil, carrageenan, sodium tripolyphosphate, taurine, fructooligosaccharides, Vitamins [L-ascorbyl-2-polyphosphate (source of vitamin C), DL-alpha tocopherol acetate (source of vitamin E), biotin, thiamine mononitrate (vitamin B1), niacin supplement, D-calcium pantothenate, riboflavin supplement (vitamin B2), pyridoxine hydrochloride (vitamin B6), vitamin B12 supplement, folic acid, vitamin D3 supplement], sodium silico aluminate, hydrolyzed yeast, choline chloride, Trace Minerals [zinc oxide, iron sulfate, zinc proteinate, copper sulfate, manganous oxide, sodium selenite, calcium iodate], marigold extract (*Tagetes erecta* L.).

Nutrition Statement:
 Animal feeding tests using AAFCO procedures substantiate that canine GASTROINTESTINAL™ LOW FAT LF™ 20 dry and canine DIGESTIVE LOW FAT LF™ can diets are formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for adult maintenance.
